

# For Control of Broadleaf Weeds and Sucker Management

## TREE AND VINE CROPS

### Key Benefits

- Can be used for broad spectrum weed control in-season, dormant, prebloom, and postharvest on labeled bearing and nonbearing crops
- Can be used in grapes, cherries, pears, and apples for management of undesirable sucker growth
- Reduced risk of volatilization
- 0 day PHI for grapes, pome fruit, stone fruit, and tree nuts
- "Caution" signal word makes Venue easy-to-use with minimal PPE requirements

### Use Information

- Venue® is a contact herbicide and requires thorough coverage for optimum control.
- Best results are achieved when used in combination with an adjuvant such as crop oil concentrate or methylated seed oil.
- Use minimum of 20 gallons of water per acre by ground
- Keep water pH ≤ 7.5

### Broadleaf Weed Control Instructions

- Use 2 to 4 fl oz per acre in tankmix with glyphosate, glufosinate, or paraquat, as well as other herbicides
- Spray when weeds are at the rosette stage or no more than 4 inches high
- A total of 13.6 fl oz may be used during the entire growing season
- Tankmixes with Venue control tough broadleaf weeds including:
  - Pigweeds
  - Common Lambsquarters
  - Prickly Lettuce
  - Common Purslane
  - Chickweed
  - Annual Sowthistle
  - Field Bindweed
  - Common Mallow
  - Pineapple Weed
  - Cocklebur
  - Dandelion
  - Black Nightshade

### Sucker Control Instructions

- Use for control of undesirable growth on the basal portion of trunks, root sprouts, and vine trunks
- Use 3 to 4 fl oz per acre
- Growth must be controlled when the tissue is young, immature, and/or not hardened off

### Grape Sucker Control

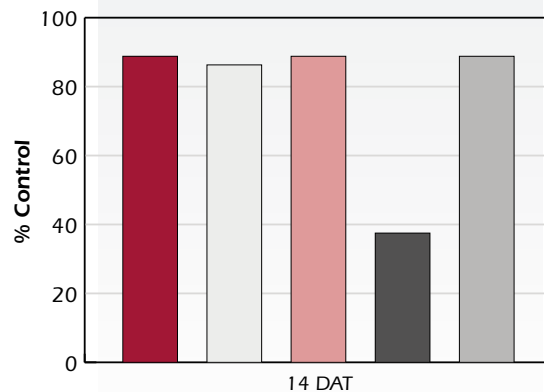

Untreated Control

Venue 3 fl oz + MSO 0.25% v/v  
14 DAT

### Cherry Sucker Control

- Venue 3 fl oz + NIS 1% v/v
- Venue 4 fl oz + NIS 1% v/v
- Aim 2 fl oz + NIS 1% v/v
- Rely 77 fl oz + NIS 1% v/v
- Gramoxone 40 fl oz + NIS 1% v/v
