

## For Fast Knockdown of Mites

FujiMite<sup>®</sup> XLO miticide/insecticide provides broad spectrum mite control in all pome fruits and hops. In addition to mite control, FujiMite provides the added benefit of contact control of mealybugs. And in pears, activity on pear psylla present at the time of your miticide application.

### Key Benefits

- Active on all motile stages of mites - larvae, nymphs, and adults
- Unique mode-of-action stops mite feeding immediately and oviposition within hours after application
- Provides control of pear psylla, leafhoppers, and mealybugs
- Easy on pollinators
- Excellent fit for resistance management

### Key Mites Controlled

- Two-spotted spider mite, Pear rust mite, European red mite

### Recommended Use Rates

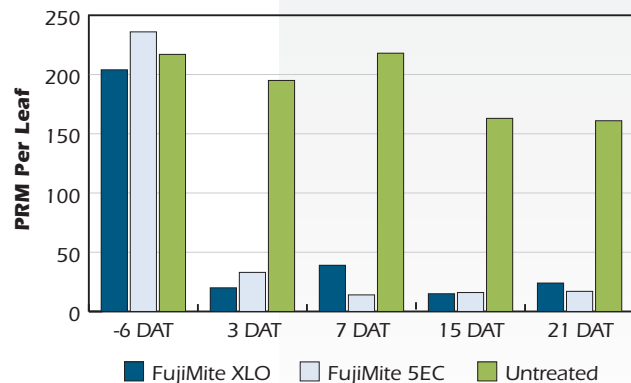

- Apply by ground using a minimum of 100 gallons of water per acre
- Rates
  - 2 pints per acre for pome fruits
  - 3 pints per acre for hops

### Use Information

- FujiMite XLO is a contact miticide. Proper application coverage and speed is critical for maximizing mite/insect control
- Reentry interval – 12 hrs
- Preharvest interval – 14 days
- Group 21A Insecticide
